

The goal of the Green Trail is to create a walkable path for campus and community.

Signs at “Green Stations” along the trail display interactive information about each location, along with QR codes.

You can now Geocache the Green Trail!

Visitors are able to easily tour our campus by following the Green Trail. We also host guided teaching tours and activities for all ages. Through this education outreach, we hope to inspire all to embrace living a more sustainable lifestyle. We look forward to expanding initiatives on campus, and beyond.

1. *Outdoor Classroom*
2. *Bottle Refill Station*

Take a tour of our new Green Trail!

- ***Gardens and Habitat***
- ***Recycling***
- ***Green Initiatives***
- ***Sustainable Practices***
- ***Energy Efficiency***
- ***Water Conservation***

**There is so much to see, learn and do.
Let's Be Green. Be Marshall Green!**

Marshall University

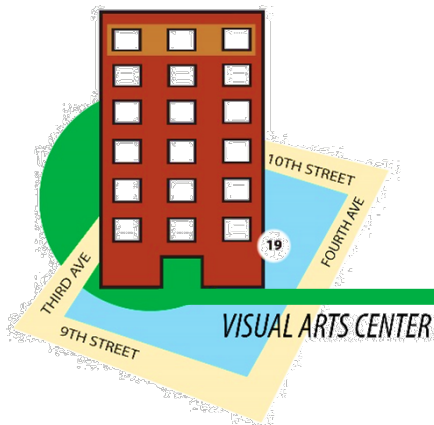

GREEN TRAIL

The MU Green Trail is a collaboration between multiple academic and non-academic departments. Students, faculty, and staff are involved in the project. Our goal is to educate campus and community on how Marshall is growing Green, and how each of us can live a more sustainable lifestyle.

Trail “Green Stations” identify important aspects of Marshall University’s sustainability efforts.

More destinations will be added as we expand our many Greening efforts.
